

## TEHNIČNI PODATKI

Vse podane dimenzije so v milimetrih

## Izgled

### Slika 15 Filter za deževnico 360

|                                                       |                                                          |
|-------------------------------------------------------|----------------------------------------------------------|
| Filter casing, top section                            | Zgornji del filtra                                       |
| Casing lid                                            | Pokrov                                                   |
| Feed                                                  | Vtok                                                     |
| Filtered water (feed to the collector tank)           | Iztok prečiščena voda v zbiralnik                        |
| Filter casing, bottom section                         | Spodnji del filtra                                       |
| Dirty water / residual water (e.g. drainage to sewer) | Voda s trdimi delci, (spelje se v meteorno kanalizacijo) |
